PROJECTS

Academic Assessment Platform

[github.com/DarsiDharani/-Academic-Assessment-Platform-](https://github.com/DarsiDharani/-Academic-Assessment-Platform)

- Built a secure multi-role assessment system for students, faculty, and admins using the **MERN stack**.
- Integrated **Gemini API** to auto-generate MCQs from syllabus content, reducing manual workload and improving question diversity.
- Enhanced exam integrity with **JWT-based authentication**, tab-switch detection, auto-submission, and live performance dashboards.
- Deployed using **MongoDB Atlas**, with responsive UI built in **React.js + Tailwind CSS**.

QuickDeliver Lite

<https://github.com/DarsiDharani/QuickDeliveryLite>

- Developed a real-time delivery request system using the **MERN stack** with **Socket.io** for live communication.
- Implemented secure login with **JWT and Google OAuth**, and built dashboards for customers, drivers, and admins.
- Enabled full delivery workflow with status transitions: **Pending → Accepted → In-Transit → Completed**.
- Integrated feedback system and chat support, improving user engagement and delivery transparency.
- Integrated Google Maps API for location tracking and Gemini AI to estimate delivery cost based on distance.
